USER GUIDE

AzmoonYar Honarestan

Module-by-module test practice for vocational school textbooks (Student edition)

AzmoonYar Honarestan is a module-based test bank for the 7 textbooks of the Computer Network and Software field in Iran's vocational schools: 1,663 multiple-choice questions across 35 modules, with answers and explanations, timed tests and a report card. You buy each module separately, and the first module of the first two books is free.

Answers explained
based on the textbook

Practice or real exam
timer and negative marking

Report card and mistakes
progress in every course

App version 1.2.1 · Guide date October 2026 · Android 7.0 or later

Questions this guide answers

1. How do I install AzmoonYar?
2. How do I sign in?
3. How do I buy a module?
4. Where do I see my order status?
5. How do I practise and track my progress?
6. How do I install a new version?
7. What if something goes wrong?
8. How is my data used?
9. Where do I get support?

> The app's screens are in Persian. Button names are shown in Persian as they appear in the app, with the English meaning in brackets.

Before you start: You need an Android phone running Android 7.0 or later (it does not install on iPhone). Signing in and buying need the internet and your own mobile number, and buying a module needs a bank card for a card-to-card transfer.

1 Install the app

How do I install AzmoonYar?

1. Get the app from the AzmoonYar page at solocodelab.com/en/products/azmoonyar-honarestan/ with the “Download for Android” button (about 1.7 MB).
2. If Android asks about installing from unknown sources, allow it; you are getting the app directly from the website, not a store.
3. If Play Protect warns you, choose “Install anyway”.

2 Sign in

How do I sign in?

1. Enter your full name and your mobile number and tap «دریافت کد» (Get code).
2. Enter the 6-digit SMS code and tap «ورود» (Sign in). If it doesn’t arrive, wait two minutes and tap «ارسال دوباره» (Send again).

The sign-in screen with a mobile number

Important: The SMS code only works on the phone that requested it, and each number is active on one phone at a time. Three wrong codes lock sign-in for that number for one hour.

3 Buy a module

How do I buy a module?

1. Tap «فروشگاه» (Shop) at the bottom and tap a course to see its modules.
2. Tick the modules you want. A free module needs no purchase. For all the modules of a course there is a «کل درس با ۲۰٪ تخفیف» (Whole course, 20% off) button.
3. The total appears at the bottom; tap «پرداخت» (Pay).

4. Transfer exactly that amount to the card the app shows (copy the card number with the copy button).
5. Record three things: the last 4 digits of your own card, the last 5 digits of the transaction tracking number and the payment time (for example 1430). Then tap «ثبت پرداخت و ارسال به ادمین» (Record payment and send to admin).

The shop and module selection

Tip: Take the tracking number from the bank receipt or SMS (sometimes called the reference number). If these three details don't match the bank record, the order is not approved.

4 After paying

Where do I see my order status?

- **Awaiting admin approval:** you can close the app. Once approved, the modules unlock automatically; tap «به‌روزرسانی» (Refresh) to get them straight away.
- **Approved:** the modules are open under «درس‌ها» (Courses).
- **Rejected:** the reason is shown there (for example the tracking number didn't match the bank), and you can submit again with the correct details.
- **Cancel:** while an order is pending you can tap «لغو این سفارش» (Cancel this order). If you have already paid, talk to support before cancelling.

5 Tests and report card

How do I practise and track my progress?

1. In «درس‌ها» (Courses) choose a course and module and tap «آزمون» (Test).
2. Choose the number of questions, practice or real mode, the timer, negative marking and option shuffling.
3. In practice mode the right answer turns green and a wrong one red after each question, with a short explanation. In real mode the result and correct answers appear at the end.

Test setup: questions, mode, timer and negative marking

The correct answer and explanation after each question

Your progress in each course is in «کارنامه» (Report card). Questions you got wrong collect in the mistakes box so you can practise them again with a test from that box.

6 Updating

How do I install a new version?

1. When the app says a new version is available, tap «به‌روزرسانی» (Update) to download it.
2. The first time, Android opens the “Install unknown apps” screen: switch it on for AzmoonYar Honarestan and go back to the app.
3. Tap «به‌روزرسانی» (Update) again, then “Update” in the install window. The new version replaces the old one and your purchases are kept.

Tip: You can also download the new file from the AzmoonYar page on the website and install it over the current app.

7 Troubleshooting

What if something goes wrong?

Problem	What to do
I don't have a password or forgot it	The app has no password. You only need your mobile number and a fresh SMS code each time.
The SMS code doesn't arrive	Check the 11-digit number, wait two minutes and tap «ارسال دوباره» (Send again). Make sure your SMS inbox isn't full and unknown senders aren't blocked.
My sign-in is locked	After three wrong codes, sign-in for that number locks for one hour. Try again an hour later or contact support.
I changed phones	On the new phone tap «دریافت کد» (Get code) with the same number. The app lets you sign the old phone out; your purchases are tied to your account.
The code doesn't work on my friend's phone	That is expected: each code only works on the phone that requested it.
A module didn't open after approval	Tap the refresh button in «فروشگاه» (Shop), or close and reopen the app. If it still doesn't open, contact support.

Problem	What to do
My mobile number has changed	Modules are tied to your mobile number; contact support.

8 Your data

How is my data used?

- Only your name and mobile number (for sign-in) and your orders (to unlock modules) are kept.
- This information is never used for advertising or sold to others.
- Don’t give your SMS code or account to anyone; it doesn’t help them and it signs your own phone out.

Support

Website	solocodelab.com/en/
AzmoonYar Honarestan page	solocodelab.com/en/products/azmoonyar-honarestan/
Contact support	solocodelab.com/en/contact/

In the app, «تنظیمات» → «پشتیبانی» (Settings → Support) has the contact buttons. «کپی اطلاعات برای پشتیبان» (Copy details for support) copies your number, app version and phone model; send it to support so they can help you faster.

Scan this code with your phone camera to open the AzmoonYar Honarestan page and support.
