USER GUIDE

VakilYar

An offline legal calculator for mahr, inheritance, blood money and court fees

VakilYar does common Iranian legal calculations on your phone with no internet, and prints the legal article and the source of each figure next to it. The mahr, inheritance and diyeh (blood money) calculators are always free; the other tools and cases and reminders unlock with a subscription. VakilYar is a calculator, not a legal adviser.

Every figure cited
legal article and source

Persian PDF report
with a tracking number

Fully offline
no internet permission

App version 1.5.0 · Guide date October 2026 · Android 7.0 or later

Questions this guide answers

1. How do I install and start VakilYar?
2. What is on the home screen?
3. How do I calculate mahr?
4. How do I divide an inheritance?
5. How do I calculate diyeh?
6. How do I save or send a result?
7. How do I unlock the other tools?
8. How do I record hearings and deadlines?
9. What if something goes wrong?
10. Where is my data kept, and how reliable is the output?
11. Where do I get support?

> The app's screens are in Persian. Button names are shown in Persian as they appear in the app, with the English meaning in brackets.

Before you start: You need an Android phone running Android 7.0 or later. VakilYar ships no rates of its own: take the day's coin price, the Central Bank consumer price index and the year's full diyeh amount from official sources and enter them yourself.

1 Install and first run

How do I install and start VakilYar?

1. Download the demo from the VakilYar page at solocodelab.com/en/products/vakilyar/ (about 1.6 MB).
2. If Android asks about installing from unknown sources, allow it and finish the install.
3. On first launch the terms and disclaimer open. Scroll up to read them to the end, tick to accept and tap «ورود به برنامه» (Enter the app).
4. On the home screen open «ماشین‌حساب حقوقی» (Legal calculator) and run your first calculation.

> **Tip:** The enter button stays disabled until you tick to accept. You can read the terms again later from «شرایط استفاده و سلب مسئولیت» (Terms and disclaimer) on the home screen.

2 Home screen and tools

What is on the home screen?

- **«ماشین‌حساب حقوقی» (Legal calculator):** eight calculators. Mahr, inheritance and diyeh are free; subscription tools show a lock icon.
- **«پرونده و یادآوری» (Cases and reminders):** record cases, hearings and deadlines with alerts ahead of time (subscription).
- **«اشتراک» (Subscription):** your subscription status and where you enter a code.
- **“Nearest deadline” card:** shown only when a reminder is coming up.

- **«نمایش و تم» (Display and theme):** text size and theme. PDF reports always use a white background so they print well.

The VakilYar home screen

The calculator list with locks on subscription tools

Subscription tools: late-payment damages, alimony (nafaqe), inheritance tax, court fees (first instance to cassation), legal deadlines with the holiday rule, and cases and reminders.

3 Mahr calculator

How do I calculate mahr?

1. Open «محاسبه مهریه» (Mahr) and choose the type: «سکه» (gold coins) or «وجه رایج» (cash).
2. **Coins:** enter the number of coins and the day's price per coin in Rial. If part has been paid, enter the coins already paid too. The marriage year is optional and only appears in the report.

3. **Cash:** enter the amount in the marriage contract, the marriage year and the claim year, then the consumer price index for both years from the Central Bank's official table.
4. Tap «محاسبه کن» (Calculate) to see the result, citing article 1082 of the Civil Code and its note.

Important: Both index numbers must come from the same table and base year. The court goes by the coin price on the day of payment and decides the index basis itself, so the result is an estimate.

4 Inheritance

How do I divide an inheritance?

1. Open «تقسیم ارث» (Inheritance) and enter the total estate value in Rial. Funeral costs, the deceased's debts and a will are optional; a will is valid only up to one third of the estate.
2. Choose whether the deceased was a man or a woman.
3. Enter the first-class heirs: number of wives or the husband, number of sons and daughters, and whether the father and mother are alive.
4. If the deceased had two or more brothers, tick that option; in that case the mother's share drops from one third to one sixth.
5. Tap «محاسبه کن» (Calculate).

An inheritance result with a tracking number and PDF button

Important: This version covers first-class heirs only. Grandchildren's shares, the eldest son's gift (habveh), diyeh inheritance and the second and third classes are not covered, and the official estate valuation is done by a court expert.

5 Diyeh (blood money)

How do I calculate diyeh?

1. Open «محاسبه دیه» (Diyeh) and enter the full diyeh amount for a non-sacred month, as announced each year by the judiciary, in Rial.
2. Choose the injury type: «نفس» (life), «اعضا» (limbs and organs) or «سر و صورت» (head and face); then set the subject, severity and count (for example 2 fingers or 3 teeth).

3. Under «شرایط خاص» (Special conditions), tick if the injured person is a woman or if it happened in a sacred month (Rajab, Dhu al-Qadah, Dhu al-Hijjah or Muharram).
4. Tap «محاسبه کن» (Calculate).

Tip: Matching an injury to its legal category is decided by the forensic medicine office, not by this app.

6 PDF report and history

How do I save or send a result?

- The result screen shows the calculation table, the input figures with the source of each, notes and limitations, and the legal basis.
- **«دانلود گزارش PDF» (Download PDF report):** the file is saved in the phone's Download/VakilYar folder. Open it with «باز کردن فایل» (Open file).
- **«ارسال گزارش» (Send report):** share the file through a messenger or email.
- Every report has a tracking number and is marked as an unofficial document.
- **«تاریخچه محاسبات» (Calculation history):** every calculation is saved automatically. Add a case label to find it easily and create the PDF again later.

Tip: Clearing the whole history cannot be undone, but PDF files you already saved stay untouched.

7 Subscription

How do I unlock the other tools?

1. On the home screen tap «اشتراک» (Subscription) to see the free and subscription features.
2. Message support from the contact page at solocodelab.com/en/contact/; support quotes the price and duration.
3. You receive a 16-character subscription code. Enter it and tap «فعال‌سازی اشتراک» (Activate subscription); everything unlocks instantly, with no internet.

The subscription screen and the steps to get a code

A subscription runs for a set time, and the days left are shown on the same screen. When it ends nothing is deleted: only subscription tools lock, and reminders you already set still go off on time.

8 Cases and reminders

How do I record hearings and deadlines?

This section unlocks with a subscription.

1. «پرونده و یادآوری» → «پرونده‌های من» → «پرونده تازه» (Cases and reminders → My cases → New case). Enter the case title, number, branch, court, the other party, your role (for example claimant or defendant), the stage and notes, then tap «ذخیره پرونده» (Save case).
2. Inside the case, under its reminders, tap «افزودن» (Add).
3. Enter the title and type (court hearing, legal deadline, payment, meeting or personal reminder), and the event's Jalali date and time.
4. Choose when to be alerted: the same morning, one, two or three days before, or one week before. Location and notes are optional. Tap «ثبت یادآور» (Save reminder).

Tip: If the event falls on an official holiday, the app warns you. You can switch a reminder off without deleting it. The legal deadlines tool also follows the holiday rule of article 444.

Important: For alerts to arrive on time, allow exact alarms and, on phones such as Samsung and Xiaomi, let VakilYar run without battery restrictions.

9 Troubleshooting

What if something goes wrong?

Problem	What to do
“The code is not valid”	Type the code again carefully. If it is still refused, get a code from support.
“This code has expired”	Message support to renew and enter the new code.
A reminder arrives late or not at all	On the reminders screen tap the exact-alarm warning and allow it. Turn off battery optimisation for VakilYar.
The PDF won’t open	If you see “No app found to show PDF”, install a PDF viewer. The file is in the Download/VakilYar folder.
The tool I want is locked	It is a subscription tool. Get a code from «اشتراک» (Subscription) on the home screen and enter it.
The result differs from the court’s figure	Check the rates and indices you entered and their sources. The final basis is always decided by the court.

10 Your data and the output

Where is my data kept, and how reliable is the output?

- VakilYar has no internet permission. Calculations, history, cases and reminders stay only in the app’s private storage on this phone and are never sent anywhere.
- Uninstalling the app also deletes the history, cases and reminders; PDF files saved in the Download folder remain.

- The output is a machine estimate and an unofficial document; it does not replace a certified court expert or a lawyer’s advice.
